

This book brings new material concerning the most famous aircraft of the whole aviation History : the beautiful P-51 Mustang.

Seen through profiles simplified via computer, the entire family is presented : no less than 50 derivatives or projects, and 30 art caricatures. The main addition concerns 500 fictitious versions, from mathematical and religious caricatures, to unbelievable shapes (Mustang canards, helicopters, airships...) and pretty hybrids (MiG 351...). This is simply an appreciation of aeronautical beauty for aviation enthusiasts who dare to daydream.
